

Engineering is the most male-dominated field in STEM, with women making only **17.9%** of the workforce in Canada. Despite the low population of women, Female engineer leaders have made many significant impacts that can not be overlooked!

Katie Weimer (Healthcare, 3D systems)

Revolutionizing healthcare by incorporating medical operations with 3D systems

Gwynne Shotwell (SpaceX)

An innovator in aerospace, making contributions to the design of reusable rockets at SpaceX.

Kimberly Bryant (Founder of Black Girls Code)

Aims to encourage young girls, especially those from minorities, to stay involved in technology careers.

Ramille Shah (Dimension Inx)

She works to advance the biomaterials and tissue engineering fields by finding new strategies for tissue and organ engineering.

FEMALE LEADERSHIP IN ENGINEERING

Hanko N.
